---

I am an aspiring developer with a working knowledge of modern frameworks and libraries. I have an interest in artificial intelligence and hope to work with intelligent systems and machine learning.

## Skills and Knowledge

---

- HTML5 and CSS3
- Bootstrap
- AngularJS
- PHP and MySQL
- Node JS
- OOP Methodology
- Agile Development
- Git
- Test-driven Development
- REST API's

## Work History

---

### August 2015 ~ Current

#### Accounts all-rounder – My Computer Support

Responsible for accounts receivable and payable, billing, payroll , customer queries and other various admin duties.

### February 2016 ~ August 2016

#### Volunteer Intern Developer – Neotill

Assisting with mobile and web application development. Mostly using AngularJS and the Ionic framework, I have gained the skills to create data-driven apps and responsive web pages.

## Education

---

### February 2015 ~ Current

#### Bachelor of Information Technology (CS Major)

Heading towards the end of second year, I have learnt a variety of programming languages and concepts including Agile Development, Test-Driven Development and UI Design.
